Our Approach

Our Agile Technology Platform

We have developed the first FDA/FSA compliant full stack 3D printer systems for consumables with less waste, using only renewable resources, giving better quality control and 10x higher traceability governance.

Hybrid Manufacturing

- Full personalisation
- Hyper Speed Line
- Less wastage
- Higher Traceability
- No Overages Required.

Products

- Specific to Consumer or Micro Cohort
- Superior quality & efficacy
- Delicious Non Pill Format
- Sugar Free, Allergen Free, Vegan
- Rapid product iterations
- Fully Sustainable packaging Solution
- Protected Design Right Format

In-House Agility

- Bespoke food safe 3D printers
- Machinery Build On Site
- Tech team in situ
- Internal AI Algorithm Development
- Flavoring, Masking & Curation

Formulation

- Patented 3D printable Matrix
- Cool Gel Technology
- Agile Dosage control
- Unique Layer Autonomy
- Plug And Play Functionality
- Optimal Bioavailability

Our Method

Over 100,000 people have personalised their daily nutrient routine with our 3D-printed, 7-layer gummies, tailored to individual health and wellness goals. Using AI-driven analysis and insights from 100,000 clinical studies, we identify the 7 best nutrients from 55 options. You choose your flavour, and we create your unique stack—one of over **60 billion combinations**—on demand.

55 Nutrient Options

- | | | |
|----------------|----------------------|-------------------|
| 5-HTP | Ginseng | Scutell'Up |
| Apple Cider | HydroCurc | Selenium |
| Vinegar | Curcumin | Silica |
| Ashwagandha | Inositol | Tart Cherry |
| Extract | Iodine | Vitamin D3 |
| Beetroot | Iron | Vitamin A |
| Beta Glucan | K2 Vital Delta | Vitamin B12 |
| Biotin | LactoSpore | Vitamin C |
| BPL1 HT | Probiotic | Vitamin E |
| Careflow Mango | Lutemax 2020 | White Kidney Bean |
| Powder | Lycopene | Zinc |
| CoQ10 | Maca Powder | |
| Cordyceps | Milk Thistle Extract | |
| Folic Acid | Nourished Greens | |
| Ginger Extract | Resveratrol | |

Driving Adherence and Loyalty through Innovative Delivery Formats

GUMMY MARKET GROWTH

The global **shift towards non-pill formats** is accelerating, with gummy supplements leading the charge. Consumers increasingly prefer convenient and enjoyable delivery methods.

2x ADHERENCE RATES

Clinical trials show **significant (2x) improvements in adherence** when using appealing formats like gummies, which enhance the likelihood of consistent, daily use. Adherence leads to better outcomes and higher repeat purchase rates.

CUSTOMER ENGAGEMENT

By actively engaging with real customers online and analysing their data inputs on our consultation questionnaire we continually add to and optimise our product offering to serve our customers' needs and demands in real time.

BENEFITS YOU CAN SEE

Our customer reviews highlight how the visual appeal and taste of our gummies contribute to **higher satisfaction**, driving overall engagement and repeat purchases both online and in stores.

AGILE INNOVATION

How Personalisation can be scaled to the Mass Market Retail

Our Agile NPD

We can test new items and gain feedback in real time – creating strong real life data sets for product validation and mainstream market expansion.

NEW PRE-FORMULATED STACKS

In less than an hour we can have a new stack, designed, formulated and available to the public.

Development time: **<1hr**

NEW INGREDIENTS

We can conduct scientific testing and ensure compliance with quality regulations for new ingredients, available across various formats

Development time: **3 weeks**

NEW FORMAT RANGES

We have the capability to develop and launch new product ranges in just 12 weeks, ensuring rapid time-to-market for innovative solutions.

Development time: **12 weeks**

Our High Speed Line

We've developed a state-of-the-art, high-capacity production line for non-personalised retail products, featuring multiple depositors along an automated conveyor system.

- **Capacity:** Capable of producing 500k stacks per day
- **Efficiency:** Significantly boosts production capacity while delivering substantial cost savings
- **Innovation:** 3 patents submitted for both the process and hardware

This innovative machine allows us to meet specific market conditions and market trend demands at high volume with remarkable efficiency and precision.
